AI INNER CIRCLE · WEEKLY INTELLIGENCE

DEVELOPMENT & WORKFLOW

1. OpenAI Codex	Best for helping business teams turn software ideas into working products and prototypes.
2. Gradio	Best for wiring AI components into interactive workflows that can be run and deployed.

DEPLOYMENT & INFRASTRUCTURE

3. Hugging Face Inference Endpoints	Best for serving model inference behind a deployed AI experience.
4. Hugging Face Jobs	Best for running jobs that support model-powered applications and search systems.
5. Hugging Face Buckets	Best for storing the resources used by hosted AI workflows and search infrastructure.

RESEARCH & DISCOVERY

6. Papers with Code	Best for searching AI research and connecting papers with their implementations.

MODEL INTELLIGENCE & OPTIMIZATION

7. IBM Granite 4.2	Best for studying how a modern LLM family is constructed.
8. Quantization-Aware Healing	Best for exploring compressed 4-bit models without automatically accepting weaker output.
9. OpenAI Jalapeño	Best for tracking advances in higher-throughput, lower-latency, and more power-efficient inference.
