MICHAEL REIMER.AI

Retention Signal Social Post Pack

AI INNER CIRCLE · WEEKLY INTELLIGENCE

1 LinkedIn | Problem post:

Most [BUSINESS TYPE] companies track [CUSTOMER DATA], but few use it to decide [NEXT ACTION]. The first signal I would monitor is [SIGNAL] because it reveals [BUSINESS MEANING].

2 LinkedIn | Contrarian post:

You probably do not need another dashboard. You need one view that answers: [RETENTION QUESTION]. For [NICHE], that view should combine [FIELD], [STATUS], and [TIME WINDOW].

3 Facebook | Educational post:

Three signs a [CUSTOMER TYPE] may need attention:

1. [SIGNAL ONE], 2. [SIGNAL TWO], 3. [SIGNAL THREE].

Which one can your current system identify today?

4 Facebook | Offer post:

We are helping [NICHE] turn existing customer records into a simple retention queue. It shows [WHO APPEARS], [WHY THEY APPEAR], and [WHAT STAFF DOES NEXT]. Comment [KEYWORD] for the outline.

5 Instagram | Carousel post:

Slide 1: Your CRM is storing clues.
Slide 2: Watch [SIGNAL].
Slide 3: Filter by [FIELD].
Slide 4: Trigger [ACTION].
Slide 5: Review [OUTCOME] every [CADENCE].

6 Instagram | Myth post:

Myth: Predictive AI must start with a massive project.

Reality: A useful first build can focus on one customer moment, [MOMENT], and one response, [RESPONSE].

7 X | Insight post:

Customer data becomes valuable when it changes the next action. Track [SIGNAL], identify [SEGMENT], trigger [FOLLOW-UP], then review [OUTCOME].

8 Threads | Conversation post:

If a customer were about to disengage, what would happen first in your business? [MISSED ACTION], [STATUS CHANGE], or [TIME-BASED EVENT]? That answer may be your first retention signal.

9 LinkedIn | Owned-audience post:

Third-party platforms can disappear. A durable audience path looks like this: [DISCOVERY CHANNEL] to [CAPTURE OFFER] to [WELCOME SEQUENCE] to [ONGOING VALUE]. Which step is missing in your business?.
